

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. INDEX

IMPORTANT NOTICE—The following index to the 1917 Brooklyn Eagle Almanac has been entirely revised and rearranged according to the most up-to-date library and encyclopedic indexing methods. A straight alphabetical arrangement has been followed in order to facilitate quick and easy reference to any subject.

CAUTION—In using this index, disregard such geographical titles as, for example, "Kings County Sheriff" and look only for "Sheriffs," where will be found the page numbers for each of the local county sheriffs' offices. Similarly, the "Metropolitan Museum of Art" will be found under "Museums"; the "New York State Barge Canal" will be found under "Canal," and also cross-indexed under "Barge." Likewise, the "United States Department of Agriculture" at Washington will be found under "Agriculture," etc., etc.

SPECIAL NOTICE Regarding Societies and Associations—Owing to the thousands of organizations about which detailed information is contained in the Eagle Almanac, it is obviously impossible to index each under its individual title. For quick reference, all these organizations have been grouped or classified under chapter headings according to the general purpose or function of the society. Consult the following list of these chapters for the KIND of organization you are looking for. For example: The "American Seamen's Friend Society" is classified under "Hospitals, Homes and Societies for Relief," and is found with the Manhattan list of those devoted to "Special Relief." Similarly, the "Froebel Society of Brooklyn," is classified in the "Literary Societies" chapter under the Brooklyn list.

THE BROOKLYN EAGLE ALMANAC.

VOLUME XXXII.

JANUARY, 1917.

THE 1917 EAGLE ALMANAC AND ITS FEATURES.

ON October 26, 1916, THE BROOKLYN DAILY EAGLE celebrated its seventy-fifth anniversary. During that time THE EAGLE has made wonderful strides, Brooklyn and THE EAGLE expanding together. The Diamond Jubilee number of THE EAGLE was a great achievement in newspaper making, well worthy of preservation.

The publication of THE EAGLE ALMANAC, now in its thirty-second year, has long been a proud feature with THE EAGLE and a popular feature with the public. The 1917 EAGLE ALMANAC will be found to be the most complete and most accurate book of its character published. The improved and simplified index will render easily available the information "general of the world, and special of New York City and Long Island," that is contained within the covers of the book. The revision of the street directories and maps was done by a corps of experts, numerous late changes in Queens Borough making the work especially difficult.

The war, politics, church, society, school, financial and sports chapters have received special attention and have been enlarged upon. A file of THE EAGLE ALMANAC is a history of public and semi-public affairs, and is indispensable to all who have need to use a book of this kind.

Striking examples of THE EAGLE spirit and enterprise were exemplified in several instances in 1916. A novel feature was a bird-house-building contest promoted by THE EAGLE for the children of Kings, Queens, Nassau and Suffolk Counties. This awakened a gratifying and lively interest in the welfare of the birds on Long Island.

The achievement of the year, however, and one that was widely commented upon, was THE EAGLE Current Topics Bee and Orchestral Contest, held at the Academy of Music in Brooklyn on May 19, 1916. This was an entirely new idea to test the ability of high school boys and girls. THE EAGLE Current Event Talks were popular features of EAGLE work.

THE EAGLE INFORMATION BUREAU has grown to large proportions, constantly rendering valuable aid to the public and issuing each year summer and winter resort directories, apartment house and educational directories.

THE EAGLE LIBRARY gained a host of new friends through the publication at popular prices of a Code of Ordinances of N. Y. City, a Long Island Automobile Guide and a Cook Book.

LIGHT AND POWER IN THE EAGLE BUILDING.

LIGHT and power is of great importance in the equipment of a modern newspaper plant. Edison service has time and again during its years of installation in The Eagle Building proved conclusively not only its economy and reliability but its adaptability to every phase of mechanical newspaper operation.

When the new Eagle Building was erected in 1904, the original plans contemplated the generation of the necessary electric current by engines and dynamos on the premises. A further and complete investigation, however, prior to the purchase of the dynamos convinced THE EAGLE that it would be a more advantageous method of operation to obtain driving energy from the Edison Electric Illuminating Company of Brooklyn.

Accordingly, THE EAGLE entered into a contract with the Edison Company for a complete light and power service. The elevators were changed over from hydraulic to electric, and all of the typesetting, printing, stereotyping and bookbinding machines were equipped with direct connected electric motors, eliminating steam absolutely, excepting during the winter months, when it is used at low pressure for heating.

Economy was the controlling reason that governed THE EAGLE in the making of this contract. The management became convinced that it could buy electric energy from the Edison Company cheaper than it could be generated in an isolated plant on the premises. Reliability of Edison service was also a determining factor, for it can readily be appreciated in the case of a daily newspaper whose time of going to press is calculated to a nicety in order to make accurate connections with an extensive delivery system, that any interruption of power, even for a few minutes, would be a very serious contingency to be most carefully guarded against.

BOROUGH OF BRONX STREET AND AVENUE DIRECTORY

The following resolution, adopted by the Board of Aldermen March 21, 1888, and approved by the Mayor March 28, 1888, will explain the plan of numbering the streets north of Harlem River: That Willis Avenue be numbered, commencing at the Harlem River, and that said numbering run continuously through Willis, Melrose and Webster avenues. That all other avenues in the Twenty-third and Twenty-fourth Wards, having a generally northerly and southerly direction, be given the same number at the cross street nearest their southern terminus as that on Willis, Melrose, and Webster avenues at the intersection of said cross street, and then numbered accordingly.

The prefix West is given to all cross streets in the Twenty-third and Twenty-fourth Wards lying west of Jerome av., which runs from Harlem River at Macomb's Dam Bridge to City line, and that the prefix East is given to all cross streets lying east of said avenue and the Harlem River.

The letters and numbers following names indicate position of the thoroughfare on the Almanac map.

*Lowest of the entire year. †Highest of the entire year. At the time of full Moon in December the Moon will be 57 degrees higher up from the southern horizon at its meridian passage, than it will be in June when full. This great swing of our luminary of the night is readily understood when we remember that the full Moon must always be on the opposite side of the Earth from the Sun, or just 180 degrees from the Sun. Hence when the Sun is lowest in June, that full Moon which falls nearest the Summer Solstice, June 5, will be the lowest, which this year is June 5 or July 5, and conversely at the Winter Solstice. Of course these conditions will be reversed south of the equator. The difference in the swing from lowest to highest may be 57 degrees, the inclination of the Sun's apparent path around the Earth being 23½ degrees, which being multiplied by two equals 47 degrees. Then the inclination of the Moon's orbit to the ecliptic being about 5 degrees there may be 5 degrees more difference or 57 degrees in all. Find a note in any astronomical text book covering this.

ECLIPSES—1917.

There will be 7 eclipses in 1917—the greatest number possible in any one year—4 of the Sun and 3 of the Moon, as follows:

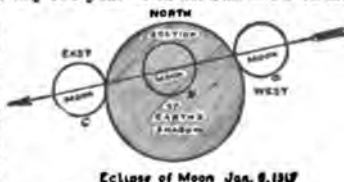

I.—Total of Moon Jan. 8, wholly visible throughout No. America and partially in So. America; the beginning will be visible in central and western Europe, N. W. Africa, and central and eastern Pacific region; the ending in N. E. Asia and E. Australia.

As shown in annexed cut the Moon will pass from W. to E. through the shadow of the earth while at her descending node so that she will make her exit from the shadow nearly her entire diameter further south than when she entered it, causing her to be more than totally eclipsed, or 16.4 digits; 12 digits being taken as the Moon's apparent diameter. The different phases of the eclipse will be visible as follows:

Partial begins at c.	Total begins.	Middle or Greatest eclipse at b.	Total ends.	Partial ends at c.
H. M.	H. M.	H. M.	H. M.	H. M.
8 42 Mo.	1 52 Mo.	2 37 Mo.	3 21 Mo.	4 31 Mo. in Washington Mean time.
8 59 Mo.	2 00 Mo.	2 45 Mo.	3 29 Mo.	4 39 Mo. in Eastern Standard time.*

II.—Partial of the Sun, Jan. 23, visible more or less in eastern Europe, western Asia and northern Africa.
III.—Partial of Sun June 18-19, more or less visible in northern and central Asia and British America. In U. S. on Pacific coast, the Sun will rise more or less eclipsed on its northern limb, on the morning of the 19th, and a very small eclipse will be visible in N. Idaho, N. Oregon, Wash. and N. W. Montana. No part of eclipse will be visible south of a line from Boise, Idaho, to Helena, Mont.

*Add 1 hr. for Atlantic time and subtract 1 hr. each for Central, Mountain, Pacific, Alaskan and Hawaiian Standard time.

ASTRONOMICAL CALCULATIONS—Continued.

IV.—Total of the Moon, July 4, invisible in the U. S. Beginning visible in Africa and partially so in Asia and Europe; the ending in Europe, Africa and So. America.

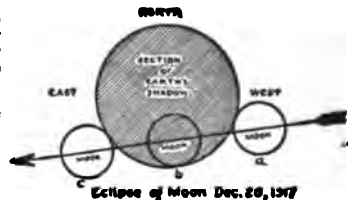

V.—Partial of the Sun, July 18, very small and around south polar regions.

VI.—Annular of the Sun, Dec. 14, visible as a partial eclipse at sunrise on coast of Argentina and southern Brazil and at sunset in southern Australia. The path of the annular phase cuts the South pole.

VII.—Total of Moon, Dec. 28, wholly visible throughout No. America, and beginning in So. America. Size 12.1 digits or a trifle more than total, as shown in annexed cut. The Moon will be at her descending node at the time of this eclipse and hence will be further south at end than she was at beginning of eclipse, as shown. The time of the various phases will be as follows:

	Washington Mean Time.	Eastern Standard Time.*
Beginning of Partial Phase.....	2h. 57m. mo.	2h. 05m. mo.
" " Total	4h. 30m. mo.	4h. 38m. mo.

End of Total Phase.....	4h. 47m. mo.	4h. 55m. mo.
End of Partial Phase.....	5h. 19m. mo.	5h. 27m. mo.

* Add 1h. for Atlantic time and subtract 1h. each for Central, Mountain, Pacific, Alaskan and Hawaiian Standard time.

TO OBTAIN CORRECT TIME BY THE SUN, MOON, PLANETS OR STARS.

TABLE I.—Begin to watch plumb line for "A" to appear vertically below Polaris:

July 30, 5 A.M.	5.30 A.M.	
Aug. 30, 8 "	8.38 "	
Sept. 20, 1 "	1.36 "	
Oct. 20, 11 P.M.	11.34 P.M.	
Nov. 20, 9 "	9.32 "	
Dec. 20, 7 "	7.34 "	

TABLE II.—Begin to watch plumb line for "B" to appear vertically below Polaris:

Jan. 20, 5 A.M.	5.32 A.M.	
Feb. 20, 8 "	8.30 "	
Mch. 20, 1 "	1.30 "	
Apr. 20, 11 P.M.	11.34 P.M.	
May 20, 9 "	9.36 "	
June 20, 7 "	7.34 "	

DIRECTIONS.—When a plumb line matches with "A" or "B" the Pole Star is approaching the meridian and the true local mean time then is the time in column "on line." Interpolate for intermediate days, subtracting 4 min. for each day after or adding 4 min. for each day before any given date.

EXAMPLE:—July 25, begin to watch plumb line about 4.40 A.M., and Polaris will be exactly in line at 5.10 A.M. correct mean local time. To change this into local Standard Time add 4 min. for each degree west of the time meridian and subtract same for stations east of the meridian. Thus, at Yakutat, Alaska, being 5° west of the 135th Standard Meridian 20 min. must be added to the observed time for Standard Time and at Jacksonville, Fla., 8° 15' east of 90th meridian, 33 min. must be subtracted for Central Standard Time. A light placed back of the head will aid in seeing the plumb line which may be hung in a convenient window and let the bob hang in a dish of water to prevent the wind from disturbing the line or the observation may be made with closed window.

If a Noon Mark is desired use two plumb lines and connect them by a row of tacks driven in the porch floor in the range of a pillar, post or window casing that will cast a shadow and apply the "Equation of Time" or "Sun Fast or Slow," or set time piece as directed in "Sun at Noon Mark," or by meridian passage of Moon, planets or stars, using an additional perpendicular on the Noon Mark to get the range by.

The above is only applicable between latitudes 30° + and 60° + because of the low altitude of pole in the first and high in the last.

STORY OF OUR WORLD FAMILY FOR A.D. 1917—A.M. 2,000,000.±

THE SUN.—In tracing the relationship, origin and age of living and fossil forms, present conditions form the basis of all work. So, likewise, in world study or astronomy. We know that the Sun is a dark body surrounded by an envelope of burning gases, in which are all the elements that enter into the earth's structure. Therefore in the beginning of Genesis the Earth and Sun were one and likewise all the other members of this world family, and a knowledge of our natural laws is the key that opens the door and reveals to us conditions that obtain in other worlds, their weight, size, distance, etc. The bright solar envelope is torn asunder with convulsions, revealing the dark interior (Sun Spots), large enough to roll a dozen Earths into, and when these are largest and most numerous, about every 11 years, the Earth trembles in sympathy—evident in earthquakes, volcanic activity, and unusual meteorological conditions—such was the year 1915. Possibly the incessant bombardments of the European war may have added to the general disturbance. During total eclipses of the Sun opportunity is afforded to steal many of his secrets, especially in such eclipses as are of longest totality, as in 1933, 1960, 2009 and 2083, which leave much time for gain in knowledge and improvements in apparatus.

MERCURY, because of his nearness to the Sun, is invisible most of the time, and is therefore the least known of our family of naked-eye worlds. Special endeavor must always be made to see him, by knowing the time and place to look and then he shows up gloriously. This year the conditions will be most favorable near the break of day Feb. 1-10 and Oct. 1-10, and near the close of twilight Jan. 1-10, April 5-15 and Dec. 15-20; always seek him near the sunrise point of the horizon in the morning and the sunset point in the evening. When an unusually bright "star" is seen at these times and places the observer may be certain of having seen the youngest of our world family to whom no descendants or moons have been vouchsafed, so far as we know.

VENUS, the goddess of beauty, will not, however, attract much attention until the evenings of fall and winter, being invisible the latter part of April when hidden from us by the Sun, and only dimly visible for weeks before and after that owing to her great distance from us and proximity to the Sun. Indeed, she will appear 17 times larger in Dec. than in May, even though at the first date she will present quite her full phase. While at the last date she will only show a thin crescent or New Moon phase. At the beginning of the year Venus will be in Scorpio and about 10° N. E. of the red star Antares; enters the western boundary of the Milky Way about Jan. 8, emerging on its eastern side on the 30th and at the end of the handle of the Milkmaid a Dipper; 1° N. of Moon Jan. 21, and less than 8° S. of Mercury Jan. 30. On Feb. 20 the Moon will overtake her while in Capricornus just south of the two bright stars in the horns of the Goat, and pass 5° to south. July 1 she will be found midway between Praesepe—the Bee Hive—and Pollux in Gemini, close to Saturn (1° N.) July 4 and in line with Castor and Pollux 5° N. W. of her, setting at 9 P. M. with Procyon 15° S. W. and Saturn still further S. W. July 23, a little north of Regulus, in the end of the handle of the Milkmaid, making an attractive grouping of interesting objects. Praesepe, or the Bee Hive, which is easily visible to the unaided

ASTRONOMICAL CALCULATIONS—Continued.

as like joining Venus and Regulus, becomes beautiful under slightest optical aid, bringing out a wealth of detail. This is only one of the numerous "Island Universes" of the heavens, similar to the Galaxy or Milky Way. Imagine our own Sun and family in the midst of such a group of suns each far brighter than our nearest stars or planets, satellites, comets, etc., with their ever recurring phenomena! This group has been repeatedly mistaken for a comet and early observers called it the "Nebula of Cancer", but even a good glass causes its filmy appearance to disappear and brings out the swarms of twinkling suns.

The latter part of Aug. she will be 10° S. from Denebola in Leo and 6° N. of the Moon Aug. 20; by the 10th of Sept. she will be less than 2° N. of Spica Virgins and 4° N. of the Moon Sept. 19, and 30° S. of Arcturus on the 25th, entering the Square of Libra Oct. 1. In this vicinity will be found the Northern Crown and Noto to the N. and on a line connecting it with Vega Lyra, is to be seen, as a dim patch of light, another vast "Island Universe" in the constellation Hercules. This is the largest and richest of the naked-eye star groups, and rich, before the time of telescopes, was supposed to be a great nebula, even a small instrument will so bring out its glories as to compel exclamations of wonder.

By Oct. 15-20 Venus will have passed into Scorpio, close to and N. of Antares, and complete her circuit of the heavens, being close to the moon Oct. 19 (an occultation in southern latitudes). During Nov. she passes through the constellation Sagittarius just above or N. of the Milkmaid's Dipper, and will be 4° S. of the Moon Nov. 15; will reach her greatest angular distance from the Sun (47° 18') Nov. 30, when a line from the North star through the Great Cross of Aquila and extended 30° will reach her. It is about this point that our family revolves. She will be in line with Polaris, Deneb and Job's Coffin Dec. 10 and 30° S. of the last, and finally attaining her greatest brilliancy and passing 5° S. of the Moon Dec. 31.

MARS will not be a conspicuous object at any time during the year, because of his nearness to the Sun, with real, but angular distance. Being in conjunction with the Sun Feb. 28 he will be quite invisible in Feb. and Mch. When first easily seen, in June, he will be in close company with Jupiter, being nearest him June 8 and only 4° north of him, rising about 5 A. M. with the Pleiades, just north of them; 10° N. of the Moon July 1 and passing just N. of Aldebaran in the Hyades near the end of July; Aug. 1 midway between Betelgeuse and Rigel, and Aug. 14, 16° N. of the Moon; Aug. 30 in line with Sirius and Castor, forming a neat triangle with Antares and Pollux; 8° N. of the Moon Sept. 11, and Sept. 20 in the Bee Hive; 4° N. of Saturn Oct. 1, a beautiful sight just E. of the Bee Hive; last of Oct. just N. of Regulus; 5° N. of Moon Oct. 10; 6° N. Nov. 8, and 8° N. Dec. 7. He begins to rise before midnight about Dec. 1, and hence becomes an Evening Star, but will not be at his usual brightest until in April, 1918.

JUPITER will be on the meridian about 7 P. M. Jan. 1, and may be found about 10° S. E. of Algenib at the E. corner of the Great Square of Pegasus and 3° directly S. of the only naked-eye nebula, the "Great Nebula of Andromeda", easily to be seen, when well above the horizon in the absence of the Moon, on a line connecting Jupiter with the base of Cassiopeia's chair. Many persons frequently mistake this for a comet, as its form is much elongated, or spindle shaped. With a moderate glass stars may be seen shining through it. Such was the mass of all the matter now embodied in our world family many millions of years ago, or in the "beginning" of the Mosaic account of creation. Along from the middle to the last of June, after Jupiter has passed the Sun and is to be seen on the other, west side of him, as a Morning Star, he will be about midway between the Pleiades and Hyades, and the latter part of Aug. 5° N. of Aldebaran. He will go a little further E. until midway between Aldebaran and El Nath and then retrograde or go back westward until end of year. His visible near approaches to the Moon will be as follows: Jan. 1 and 29, Feb. 23, Mch. 25, Apr. 23, May 14, Aug. 11, Sept. 7, Oct. 5, Nov. 1 and 23, and Dec. 25, in all of which he will be from 3° to 6° S.; at E. conjunction Sept. 3, and at opposition or 180° from the Sun Nov. 29.

SATURN will appear to the best advantage at or near the beginning of the year and at its close, being in conjunction with an All Night Star and rising near sunset. No use to seek him in July or Aug. Jan. 1 he will be in Gemini and about 5° S. of Pollux and in line with that star and Castor, with the Bee Hive a few degrees west, and he will be retrograding or going west past the stars until Apr. when he will be between Procyon and Sirius and he will advance the remainder of the year. His close approach to Mars was mentioned under that star. Castor is the finest double star in the northern heavens. Extra good eyesight, unaided, shows the companion star and the slightest optical aid brings it out plainly. His near approaches to the Moon will be as follows: Jan. 9, 1° N., Feb. 5, Mch. 4 and 31, 1/4° N., Apr. 23, 1° N., May 25, 1 1/4° N., Oct. 10, 2 1/4° N., Nov. 6 and Dec. 4, 4° N.

No attention is given to Uranus or Neptune, as the latter is never to be seen except with a good telescope and knowledge of place, and the former is only just discernable to the normal eye when at his very brightest and so moonlight.

WEATHER AND TEMPERATURE SIGNALS.

NOTE.—The display of weather and temperature flags, with the exception of the cold-wave flag, is now confined to rural districts and towns of 5,000 or less inhabitants; the display has been discontinued in places of greater population, except that arrangements are sometimes made by which the forecasts are furnished to certain persons or firms who make the display without expense to the government. The cold-wave flag will be displayed as heretofore.

When No. 4 is placed above Nos. 1, 2, or 3, it indicates warmer; when below, colder; when not displayed temperature is expected to remain about stationary. The cold-wave flag is displayed when an unusual fall in temperature (the limits varying with the locality and time of year) is anticipated. When displayed on pole the flags are arranged to read downward; when displayed from horizontal supports, a small streamer is attached to indicate the point from which the signals are to be read.

Storm and Hurricane Warnings.

1st.—A storm warning; red flag with black center. 2d.—When red pennant is hoisted above storm warnings winds are expected from northeast quadrant; when below, from the southeast quadrant. 3d.—When white pennant is hoisted above storm warning, winds are expected from the northwest quadrant; when below, from the southwest quadrant. 4th.—Red pennant alone, small craft warning, indicates squalls and winds dangerous to small craft. 5th.—Hurricane warning and extremely dangerous storms, two red flags with black centers, displayed one above the other. 6th.—Night storm warnings; a red light for easterly winds and a white light below a red light for westerly winds.

Storm Warning Stations.

Storm warning display stations, located in New York City and vicinity, are with exception of Sandy Hook, N. J., under the control of the Weather Bureau office, 17 Battery Place, Manhattan.

Stations equipped with electric lights displaying day and night warnings throughout the year:

New York City, 17 Battery Place, Sandy Hook, N. J.; Long Branch, N. J.; Fort Schuyler (Throg's Neck), N. Y.; Oyster Bay, N. Y.

Storm warnings are furnished to naval wireless sta-

tions at Brooklyn Navy Yard and Fire Island, N. Y. for distribution to vessels at sea equipped with wireless apparatus.

Stations displaying day warnings during the summer months:

Indian Harbor Y. C., Greenwich, Conn.; New Rochelle Yacht Club, New Rochelle, N. Y.

Day warnings are displayed throughout the year at Keyport Yacht Club, Keyport, N. J.; Jack's Boat House, 138th and No. River, and on U. S. Revenue Cutters in the vicinity.

HIGH WATER AT NEW YORK (GOVERNOR'S ISLAND).

The high water tables are from the book prepared and published by the United States Coast and Geodetic Survey at Washington. *Oh. 03m.* is midnight, and *12h. 00m.* is noon. To change Eastern Standard Time to New York "Local Time," add 4 minutes. Eastern Standard Time is 5 hours slower than Greenwich Time. The heights, in ft. and tenths, are reckoned from mean low water. All hours less than 12 are in the forenoon (a. m.), all greater are in the afternoon (p. m.), and when diminished by 12 give the times after noon; for instance, 15:47 is 3:47 p. m. **☉**, new moon; **☾**, 1st quar.; **☽**, full moon; **☾**, 3d quar.; **E**, moon on equator; **N**, moon farthest north or south of equator; **A, P**, moon in apogee or perigee.

N. Y. STATE MILITARY DRAFT LAW.

The N. Y. State Military Conscription Law provides that in time of need or within the discretion of the Governor male citizens of the State between the ages of 18 and 45 years may be drafted into the State Militia to fill the gaps caused by the failure of sufficient volunteers to place the military cos. on a war footing.

Senator Stivers of Middletown was author of the law. By the provision of Chap. 563 of the Laws of 1916 the Governor has specific authority to order compulsory drafts of citizens "for the purpose of maintaining the National Guard and Naval Militia at a standard of efficiency required for public safety or of conforming to any organization now or hereafter adopted for the Army of the U. S. or prescribed by the laws of the U. S. for the organization of the National Guard or Naval Militia."

U. S. POSTAL SAVINGS.

On July 31, 1916, 7,678 post offices were accepting deposits in the U. S., Alaska, Porto Rico and Hawaii. Number of depositors approximated 612,000, with \$89,700,000 to their credit. Of this sum, \$76,400,000, or nearly 7-8ths, was accumulated at the 473 offices having deposits of \$20,000 and over, and about 7-10ths in the 87 offices having more than \$100,000 on deposit. 9 offices had over \$1,000,000 each on deposit. N. Y., B'klyn., Chicago, Boston, Detroit, Pittsburgh, San Francisco, Portland and Phila. hold about 42% of all deposits.

AREA AND DENSITY OF BOROUGHS.

The determination of an exact area of New York City and its boroughs is a debatable matter. This is due to the irregular waterfront lines and the existence of considerable areas under water, marsh lands, or meadow lands, which different surveyors compute differently. Some base their figures with pierhead lines, others within bulkhead lines and still others within borough lines. No official figures exist for the exact areas of the boroughs. The Eagle Almanac gives below the areas by Assembly Districts, computed by the topographical bureau of each borough; also the areas computed by wards by the Health Department. The discrepancies are explained above. The Eagle Almanac gives the preference to the Topographical Bureau figures, as same are computed for the official use of each Borough President's office.—Editor.

FIRST ENGLISH DIRECTORY.

The first directory published in the English language was issued in 1595, in the reign of Queen Elizabeth. The British Museum has a copy of book. The first American directory came out in Phila. in 1785; the first N. Y. directory in 1786, and Boston's first directory in 1794. This earliest of N. Y. directories, pub-

lished by David Frank, a "conveyancer and accountant," contained 554 names, an almanac, a table of coins, etc.

The progress made in N. Y. City in directories follow, year first, then number of names:

1786, 554; 1810, 75,000; 1834, 38,000; 1852, 129,000; 1882, 240,000; 1886, 314,000; 1910, 514,000; 1913, 600,000; 1915, 1,104,676.

NEW YORK CONNECTING R. R. BRIDGE.

The most important link in railway connection with Brooklyn is the cantilever bridge over Hell Gate from the Astoria section of Queens, crossing Ward's and Randall's Islands to the Port Morris region of the Bronx. The construction is for the New York Connecting Railroad, in which the Pennsylvania and New Haven Systems are interested. Starting from the yards of the N. Y. N. H. & H. R. Co. at 142d in the Bronx, the line crosses the Bronx Kills by a lift bridge, 490 ft. long, with 2 spans of 175 ft. each. It is then carried along the eastern shore of Randall's Island by a viaduct half a mile in length to Little Hell Gate, which is crossed by a bridge 1,150 ft. long to Ward's Island. Across this island the road runs on a viaduct 2,600 ft. in length to Hell Gate, where has been built the most massive bridge structure of its kind in this country. It has huge granite piers 250 ft. high and a span of 1,107 ft. The clear height above mean high water is 135 ft. The great steel structure, rising in a parabolic arch, has four tracks, two for passenger trains and two for freight. The train floor level is below the crown of the arch and suspended from it. The estimated weight of steel in the viaducts and

bridges together, about 3 miles long, is 90,000 tons. From the Long Island end of the bridge the passenger tracks continue partly on viaduct and partly on embankment to the Sunnyside yards at 133rd Pennsylvania R. R. in L. I. City. The freight tracks continue through Queens to Fresh Pond and the East New York part of Brooklyn, where they follow the route of the Manhattan Beach Railroad to Flatbush and then the Bay Ridge branch of that road to the waterfront at 65th St. From that point a future tunnel may connect with Staten Island and its railroads. But floats are first to be used to convey freight cars from Greenville, on the Jersey City side, to the Bay Ridge docks. The passenger connection between the Pennsylvania System and the New Haven is by the tunnels of the former from New Jersey to Long Island, and thence by the Connecting Railroad to Port Morris, where the New Haven road practically begins. The cost is estimated at \$30,000,000.

John D. Rockefeller's private fortune, exact of endowment funds and other benefactions, exceeds that of any man in the world, exceeding in July 1911, \$1,000,000,000.

BROOKLYN.

Park System of Bkln. comprises 48 parks, play-
 grounds and open spaces, with an area of 1,151
 acres, and 16 parkways and streets, with total
 length of 29 miles. The total assessed valuation
 of Bkln.'s park property amounts to approximately
 76 millions of dollars. Park Dept. Officers: Litch-
 field Mansion, Prospect Park, Bkln. (For Officers
 and Employees see City Government Chapter.)

Commissioners to lay out a Park System in Bkln.
 were appointed in 1835. Prospect Park, which con-
 tains 526 acres, and is conceded to be one of the
 finest parks in the country, both from a landscape
 and from a recreation point of view, was ac-
 quired in 1859. Development begun July 1, 1866,
 and completed in Oct., 1867. Land cost \$3,919,370,
 construction about \$6,000,000.

Attractive features are its natural beauty, great
 variety of its woodland, Botanic Garden, Menage-
 rie, Greenhouses, Vale of Cashmere, Rose Garden,
 the formal and old-fashioned Flower Gardens, the
 large and small lake, with a great quantity of
 boats for use of public; 300 tennis courts, croquet
 field and hockey field. The Parade Grounds of
 about 40 acres is located just south of Prospect
 Park and is used exclusively for baseball, cricket,
 bowling on the green and football.

Five parks and 1 p'kway, with aggregate area of
 373 acres, front on N. Y. Harbor and adjacent
 waters. These shore front properties have been
 only partly developed. The improvement of the
 Shore Road has been in progress for a number of
 years, and the last part of the development, incl.
 construction of a sea wall along entire water
 front from Bay P'kway to Fort Hamilton, was
 completed in early part of 1915. This promises, in
 a few years, to be one of the most interesting and
 picturesque waterfront parks in the world. The
 development of Dyker Beach Park will be a fine
 addition; by filling in the marsh land and making
 an athletic field of some 70 acres, which will be
 in full view of the Bay and Narrows, ample space
 will still be left for ornamental park development.

In 1915 the Betsy Head Playground was opened to
 the public, and is one of the best equipped play-
 grounds and recreation fields in the U. S. It oc-
 cupies 4 sq. blocks in the Brownsville section and
 contains a children's playground and farm gar-
 dens, a large athletic field and outdoor gymna-
 sium, shower bath for use throughout the year and
 an outdoor swimming pool for summer use. The
 bldgs. and equipment were paid for by bequest of
 \$187,764.84, made by the late Betsy Head of Suf-
 folk Co. The land, valued at more than \$250,000,
 was paid for by the property owners within a ra-
 dius of 1 mile of the playground.

L, B'way subway, changing at 207th st. for crostown Bronx Park car. Contains extensive greenhouses and a large museum collection; also free public lectures every Sat. from April to Nov.

Grand Boulevard and Concourse.

The Concourse, under the jurisdiction of the Borough of The Bronx, is designed to provide connection bet. Mhntn. and the park system in the northern and eastern portions of The Bronx. The estimated cost of the work of construction was \$1,032,158 and the actual cost at contract price, \$1,049,600. The contract was let Aug. 20, 1902, the lowest bid being \$1,011,322. The ground was broken for the work by President Haffen on Oct. 2, 1902, at the junction of Morris av. and 175th. The time estimated for its construction was 1,000 working days. The contract for this work was formally accepted Nov. 24, 1909.

The entrance to the Concourse, including Cedar (Franz Sigel) Park, is a stretch of land 3,300 ft. long from 400 to 500 ft. wide and extends from N. Y. Central and Hudson River R. R. to E. 164th; the route of the Concourse is along the ridge bet. Jerome and Webster avs. It is about 4 miles long and 183 ft. wide, crossing a deep valley at E. 175th, with a beautiful masonry arch. It has a central driveway for fast driving, 54 ft. in width, a macadamised driveway on each side, 24 ft. in width, for general traffic, and access to abutting property. There is a 20-ft. sidewalk on each side; trucking is prohibited and there are no bicycle paths.

Spaces bet. the driveways and the paths were planted with the trees and sodded; over 2,000 trees were planted.

The Concourse is connected with Mhntn. by means of the Madison Av. Bridge and 149th St. Bridge at Lenox av., through Mott av., and also by means of E. 161st and Central Macomb's Dam Bridge with 7th Av. Blvd. and Washington Hgts.

Bronx River Parkway Reservation.

The Bronx River P'kway Reservation extends along both sides of Bronx River from northerly line of Botanical Gardens, or Bronx Park, to lands of Bd. of Water Supply at the Kensico Reservoir and dam, total length of 15 $\frac{1}{2}$ miles.

The Reservation varies from 400 to 1,500 ft. in width, avg. width being about 600 ft., and incl. low lands along Bronx River and in many cases adjacent slopes.

PARKS, DRIVES AND STATUES—THE BRONX—Continued.

The P'kway is being improved by the Bronx P'kway Commn., authorized by the Legislature of the State of N. Y. and appointed by Gov. Hughes. A parked driveway will be built throughout its length connecting drives of the City's park system in Bronx with State roads diverging from Kensico Dam at Valhalla.

The trml. feature of the P'kway will be the great Kensico Dam, architecturally finest in the world. It holds back a lake of 4,000 acres. In front of the dam are fountains and gardens and nearby an aeration basin with more than 1,800 fountains. Commrs. are Madison Grant, Pres.; W. W. Niles, Sec.; J. G. Cannon, Treas.; Jay Downer, Engr. and Sec., 280 Madison av., Mh'tn., N. Y. C.

THE HALL

OF FAME.

In March, 1900, Chancellor MacCracken of New York University, announced that \$250,000 had been given that institution for a Hall of Fame of great Americans. The conditions were that 50 names might be chosen in 1900 and 5 more each succeeding 5 years through the 20th century. 100 electors from all of the 45 States were asked to make nominations, and to indicate each one his choice of 50 names. Upon Oct. 1, 1900, it appeared that 97 electors had voted and that 29 names had received a majority of 51 votes. The number of votes for each was as follows: George Washington, 97; Abraham Lincoln, 96; Daniel Webster, 96; Benjamin Franklin, 94; Ulysses S. Grant, 93; John Marshall, 91; Thomas Jefferson, 91; Ralph Waldo Emerson, 87; Robert Fulton, 86; Henry W. Longfellow, 85; Washington Irving, 83; Jonathan Edwards, 82; Samuel F. B. Morse, 82; David G. Farragut, 79; Henry Clay, 74; Nathaniel Hawthorne, 73; George Peabody, 74; Peter Cooper, 69; Robert E. Lee, 68; Eli Whitney, 69; John J. Audubon, 67; Horace Mann, 67; Henry Ward Beecher, 64; James Kent, 65; Joseph Story, 64; John Adams, 62; Wm. E. Channing, 58; Gilbert Stuart, 62; Asa Gray, 51.

In 1904 the constitution of the Hall was amended to provide for choosing separately 10 names of famous American women in 1905, and 2 in each succeeding quinquennium.

In Oct., 1905, the Senate received the ballots of 95 electors, of whom only 85 undertook to consider the names of women. A majority of 51 was demanded, but in the case of the names of women a majority of only 47. The following 8 persons were found to be duly chosen: John Quincy Adams, 60; James Russell Lowell, 59; William T. Sherman, 58; James Madison, 56; John G. Whittier, 52; Mary Lyon, 53; Emma Willard, 50; Maria Mitchell, 48.

In Oct., 1910, the Senate received the votes of 97 electors; 51 votes were required for choice; 10 names were added, as follows: Harriet Beecher Stowe, 74; Oliver Wendell Holmes, 69; Edgar Allan Poe, 69; James Fenimore Cooper, 62; Phillips Brooks, 60; William Cullen Bryant, 59; Frances E. Willard, 56; Andrew Jackson,

52; George Bancroft, 52, and John Lothrop Motley, 51.

Hereafter instead of one elector for each state, the rule requires one for each state, or each group of states, having 1,000,000 inhabitants. The new rule requires two-thirds of the electors in order to choose any name that is not indorsed by that group (among the 7 groups of electors), to whom it is sent in May of the year of election for special consideration and report. Any name in the final list of nominations made up June 30 so indorsed, may be chosen by a mere majority of the 100 electors. The electors will have the entire summer to weigh the merits of the candidates, but must return their final ballots by Oct. 1.

For the election, in 1915, the 100 electors were called to choose not more than 23 American men and not more than 11 famous American women. 97 electors sent ballots, 3 having died during year; 9 names were chosen by a majority of 49 or more electors, as follows: Alexander Hamilton, 70; Mark Hopkins, 69; Francis Parkman, 65; Louis Agassiz, 64; Elias Howe, 61; Joseph Henry, 56; Rufus Choate, 52; Daniel Boone, 52; with one woman, Charlotte Cushman, 52.

The Constitution was amended in 1914, by striking out the separable election of foreign-born Americans, so that the 4 foreign names which had been chosen in 1905 and 1910 were resubmitted in 1915 for election in competition with native-born Americans. Two names, Alexander Hamilton and Louis Agassiz, were approved. The others, John Paul Jones and Roger Williams, lacked a majority, but remain in nomination for 1920. Thus 50 famous men in all have been admitted, and 6 famous women. Total, 56.

Nominations for 1920 should be addressed to Chancellor Emeritus MacCracken, University Heights, New York City.

Hetty Green, the "world's richest woman," died on July 3, 1916, at her son's home in N. Y. C. Her fortune was estimated as \$100,000,000.

The foundation of one wing of the Brooklyn Central Library Bldg., Flatbush av. and Eastern Parkway, for which \$200,000 had been appropriated by N. Y. City, is now completed. The entire building, which will be one of the handsomest structures of its kind, will cost approximately \$5,000,000. It will occupy a site extending 456 ft. on Flatbush av., and 332 ft. on Eastern Parkway, and a frontage of 70 ft. on the Prospect Park Plaza, opposite to the Memorial Arch and extending 456 ft. along the Mt. Prospect Reservoir in the rear. The site covers 6,800 sq. ft., or 2 1/4 acres. The building will be five stories high and will have a book capacity of 2,500,000 volumes. Ground was broken on June 5, 1912. The Public Library system of the borough, which embraces 30 branches, 3 stations (small branches open afternoons), a department of traveling libraries, and a library for the blind, with about 875,000 volumes, has an annual circulation of more than 5,000,000. NATURAL-BORN CITIZENS DEFINED.

A natural-born citizen is one born within the territorial limits of the U. S. Under the constitution no man born outside that territory is eligible for President. The question was raised when Secretary Lane of the Interior Dept. was talked of as a Presidential candidate. Although he has lived in California for many years, it was pointed out that he was not eligible for the high office, as he was born in Prince Edward Island, Canada.

MINERAL PRODUCTION OF NEW YORK.

The mineral production of N. Y. State, based so far as practicable on the crude materials taken from mines, quarries and wells, was valued for fiscal years 1915-16 at \$25,932,407, according to returns received at the State Geologist's office in its annual canvass of the enterprises. The total was a little larger than that for 1914, but still fell short of record established in earlier years when the commercial and financial situation was more normal.

One of the interesting developments was the establishment of an industry new to the State—the exploitation of zinc ores in St. Lawrence Co., resulting in first commercial shipments of that mineral from a N. Y. locality. Occurrences of ores have been uncovered in different places within a district some 13 miles long and from 1 to 3 miles wide that includes parts of towns of Edwards and Fowler, on the Adirondack border.

Iron mining experienced a revival of prosperity, and mines in Adirondacks, Hudson Highlands and along Clinton belt contributed a gross output of 1,905,064 long tons, or 20% more than in 1914. Actual shipments of furnace ore and concentrates, however, did not reach that figure on account of reduction entailed by concentration of some of Adirondack ores.

The salt industry participated in the advance; the output of 11,096,301 barrels exceeded that of any preceding year and placed the state in the front rank among the salt producing sections of the country. About 1-3 of domestic supply of salt comes from mines and brine wells in Central and Western N. Y.

The flow of gas was considerably smaller than in 1914, amounting to 7,110,040 thousand cu. ft., while petroleum output maintained its average with 223,540 barrels.

Altogether the schedule of mineral products mined or quarried in N. Y. contains over 30 different items, an exceptional variety for a single State. In the production of such substances as bldg. brick, emery, feldspar, garnet, graphite, gypsum, millstones, mineral waters, salt, molding sand, pyrite, stone and talc, the local enterprises rank among first in the country.

HORSE-DRAWN VEHICLES MANUFACTURED

The number of carriages and wagons manufactured in 1914 in the U. S. was 297,569 less than in 1909, a decrease of 25.1%. The value of the total number of these classes of vehicles decreased \$21,764,002, or 23.1%.

POSTAL SAVINGS BANK SYSTEM.

The Postal Savings Bank System was established in Brooklyn on Sept. 1, 1911, at the General Post Office, Washington and Johnson streets. The hours of deposit are from 9 a.m. to 5 p.m. and at General P. O. to 9 p.m. Postal savings deposits are accepted at stations and suburban post offices. The first postal savings bank to be opened in N. Y. City started at the General P. O., Mhln., on Aug. 1, 1911.

Information for Depositors.

The Postal Savings System is established for the purpose of providing facilities for depositing savings at interest with the security of the U. S. Government for repayment. Accounts may be opened and deposits made by any person of ten years of age or over in his or her own name, and by a married woman in her own name and free from any interference or control by her husband.

How to Open an Account.

To open an account a person must fill out and sign an application. Deposits will be received in the form of either Postal Savings Cards properly completed to the amount of \$1, or cash not to exceed \$1,000 for any one account. Deposits are evidenced by postal savings certificates issued in fixed denominations of \$1, \$2, \$5, \$10, \$20, \$50 and \$100, each bearing the name of the depositor, the number of his account, the date of issue, the name of the depository office and the date on which interest begins. Duplicates of each certificate issued are retained by the postmaster, so that a depositor losing his certificate may obtain a duplicate. No account may be opened for less than \$1.

Savings Cards and Stamps.

Postal Savings Cards and Postal Savings Stamps, valued at 10c. each, are sold at the retail stamp windows of the General Post Office and at all stations.

Amounts less than \$1 may be saved for deposit by the purchase of 10c. postal savings cards and 10c. postal savings stamps. Each card contains blank spaces to which savings stamps may be affixed. A postal savings card with nine 10c. savings stamps thus affixed will be accepted as a deposit of \$1. Savings cards and stamps will be redeemed without

the issue of savings certificates. Deposits may be made by mail.

Two Per Cent. Interest Paid.

Interest on any deposit is payable annually at the rate of 2% per annum, computed on each savings certificate separately. No interest will be paid on money which remains on deposit for a fraction of a year only. Deposits will bear interest from the first of the month next following that in which deposited. Interest will continue to accrue on a savings certificate as long as it remains outstanding, certificates being valid until paid, without limitation as to time. Compound interest is not allowed on an outstanding certificate, but a depositor may withdraw interest payable and include it in a new deposit, which will bear interest at the regular rate. A depositor may at any time withdraw the whole or any part of his deposits to his or her credit with interest payable, by surrendering savings certificates, properly indorsed, for the amount desired. Deposits to, or withdrawals from, an account may be made by depositor's representative upon properly filling out forms provided for that purpose, or by mail. In case of death the entire account with interest due will be paid to executor or persons entitled to receive it, upon application in proper form. A woman who opens an account and afterward marries must present her savings certificates at her office in order that the certificates may be indorsed as payable to her in her new name.

Postal-Savings Bonds.

A depositor will be permitted to exchange the whole or any part of his deposit in sums of \$10, \$100 or \$500, into U. S. registered or coupon bonds bearing interest at the rate of 2½% per annum, payable semi-annually, and redeemable at the pleasure of the U. S. after one year from date of issue, both principal and interest payable 10 years from such date in U. S. gold coin. Such exchange may be made under date of Jan. 1 and July 1 of each year, provided such bonds are then available. Application for such bonds may be made at any time. Those for issue Jan. 1 must, however, be applied for not later than 1st business day of pre-

POSTAL REGULATIONS—POSTAL SAVINGS BANK SYSTEM—Continued.

ceding Dec., and those for issue of July 1 not later than 1st business day of preceding June.

On the application of any holder the Board of Trustees will purchase postal-savings bonds at par. Bonds sent to the board for purchase must be assigned to the "Board of Trustees, Postal Savings System."

BONDS LOST OR DESTROYED—Payment on registered bonds that have been lost or stolen may be stopped by notifying the Sec. of the Treasury (Division of Loans and Currency) at Washington. When bonds, either registered or coupon, have been destroyed wholly or in part, or defaced, a claim may be filed with the Sec. of the Treasury under certain prescribed conditions for their replacement. Claims will not be allowed for coupons detached from coupon bonds.

CIVIL SERVICE INFORMATION.

FEDERAL.

Officers—Three commissioners are appointed by the President to assist him in classifying the government offices and positions, formulating rules and enforcing the law. Their office is in Washington, D. C.

General Rules—The fundamental rules governing appointments to government positions are found in the civil service act itself. The present rules were approved March 20, 1903, and went into effect April 15, 1903. The classified civil service includes all officers and employees in the executive civil service of the U. S., except laborers and persons whose appointments are subject to confirmation by the Senate.

Examinations—These are conducted by boards of examiners chosen from among persons in government employ and are held twice a year or oftener if the needs of the service require it in all the states and territories at convenient places.

Qualifications of Applicants—No person shall be examined who is not a citizen of the United States. The age limitations in the more important branches of the public service are: Post office, 18 to 45 years; rural letter carriers, 18 to 55; internal revenue, storekeeper, gauger and storekeeper-gauger, 21 years and over; other positions, 18 years or over; railway mail, 18 to 35; lighthouse, minimum 18 years for all positions except those requiring a license from Steamboat Ins. Service, for which minimum age limit is 21, maximum, 40 years for officers of tenders, except cadet officer and cadet engineer, for which maximum age limit is 25 years, except for those already in lighthouse service, for which it is 30 years. There is no maximum age limit for other positions in this service. General departmental, 18 and over; clerks, draftsmen, bookkeepers, stenographers and typewriters, 18. These age limitations are subject to change by the commission. They do not apply to applicants of the preferred class. Applicants for the position of railway mail clerks must be at least 5 feet 5 inches in height, exclusive of boots or shoes, and weigh not less than 130 pounds in ordinary clothing and have no physical defects. Applicants for certain other positions have to come up to similar physical requirements.

Method of Appointment—Whenever a vacancy exists the appointing officer makes requisition upon the civil service commission, or its representatives, the district secretaries, for a certification of names to fill the vacancy, specifying the kind of position vacant, the sex desired and the salary. The commission thereupon takes from the proper register of eligibles the names of three persons standing highest of the sex called for and certifies them to the appointing officer, who is required to make the selection. He may choose any one of the three names, returning the other two to the register to await further certification. The time of examination is not considered, as the highest in average percentage on the register must be certified first.

Removals—No person can be removed from a competitive position except for such cause as will promote the efficiency of the public service.

Salaries—Entrance is usually in the lowest grades, the higher grades being generally filled by promotion. The usual entrance grade is about \$900, but appointments may be made at \$840, \$760 or \$600.

STATE.

Detailed information by addressing "State Civil Service Commission, Albany, N. Y."

The State Civil Service Rules provide for:

(a) **Exempt Class**—Includes deputies of principal officers; secretaries of boards or commissions; clerks and deputy clerks of courts; all other positions for filling of which examinations are found not to be practicable.

(b) **Non-Competitive Class**—Includes minor positions in institutions where competition is impracticable; also a few subordinate positions in the State Departments.

(c) **Labor Class**—Includes unskilled laborers, skilled laborers and positions of similar character not included in competitive or non-competitive classes.

Examiners—Appointed by State Civil Service Commission. Work under direction of Chief Examiner.

Applications—Applications for positions in competitive class must be executed in applicant's handwriting on blank form supplied by and forwarded to "State Civil Service Commission, Albany, N. Y.," but not until examination has been ordered.

Examinations—Held as the needs of the service require, usually in series at intervals of five or six weeks during the year. Examinations usually in writing, each subject rated on basis of 100. Every candidate who receives a rating of at least 60 per cent. on each subject of the examination and general average of not less than 75 per cent. is eligible.

State Civil Service Commission.

The State Civil Service Commission consists of 3 members, appointed by the Gov. and with the advice of the State Senate, not more than 2 of them to be adherents of the same political party. The salary is \$4,000 a year, for pres. and \$3,000 per year for associate commr., beginning Oct. 1, 1915, with necessary traveling expenses, term of office 6 years. The commission has power to appoint a secretary, a chief examiner and such other officers, clerks and examiners as may be deemed necessary. The commission has supervision of the administration of the civil service law and rules in the 59 cities of the State. It has charge and control of examinations and appointments in the service of the State, the counties of Albany, Bronx, Chautauqua, Erie, Kings, Monroe, Nassau, New York, Niagara, Oneida, Onondaga, Orange, Queens, Rensselaer, Richmond, Suffolk, Ulster and Westchester and the villages of Ossining, Peekskill and Port Chester. During the year 1915 over 21,000 persons were examined and upward of 3,000 appointments were made to competitive places. On Jan. 1, 1916, there were 20,884 positions, not including laborers, subject to the jurisdiction of the commission. These positions were classified as follows: Unclassified service, 1,882; classified service, A. exempt, 1,609; B. competitive, 11,888; C. non-competitive, 6,608.

BATTLE OF LONG ISLAND ANNIVERSARY.

The 140th anniversary of the Battle of Long Island was celebrated Sunday, Aug. 27, 1916, at Prospect Park, under direction of the Kings Co. Historical Society and Bkln. Park Dept. The speakers were R. V. Ingersoll, W. A. Prendergast and Arthur M. Howe. The day marked the beginning of a campaign to familiarize everyone with the fact that Bkln.'s share in the War of the Revolution was important.

There were 4 distinct engagements in the Battle of Long Island. The 1st was at Battle Hill in Greenwood, the 2d in Prospect Park, the 3d at the junction of 5th, Flatbush and Atlantic aves. and the last and most important at the Old Stone House, 4th and 5th and 3d sts. A total of about 9,000 Americans were involved, against about 25,000 British and Hessians. Loss of Americans, about 1,200; loss of enemy, about 400. Historic markers are placed at various critical points in this battleground, at the park wall opposite 1st st., on the big meadow near the main entrance on line of 1st st., and also on the East Drive, at Battle Pass and on Lookout Hill.

INSURANCE COS. DEATH CLAIMS.

The life insurance cos. in the U. S. and Canada paid out, on this side of the water, in their last fiscal year \$451,308,000 in death claims and \$282,400,000 in premium savings, surrender values and annuities—a total of \$733,708,000. This is \$47,000,000 more than the aggregate for 1914. The increase in business prosperity was shown by the fact that the demand for loans on policies decreased. Figures for the U. S. are:
New policies written in 1915..... 3,604,000,000
Policies in force, Dec. 31, 1915..... 22,736,000,000
Number of policies in force

The number of policies of ordinary life insurance surrendered to American cos., in 1915, was approximately 300,000.

At the end of 1915 more than \$601,000,000 of loans was outstanding on life policies.

WEALTH OF UNITED STATES.

The wealth of the U. S. reported for 1915, doubled that of 1900. Measured in dollars, this increase is more than \$94,000,000,000.

The Census Bureau reports the total wealth as nearly \$188,000,000,000, making the U. S. the richest nation in the world. U. S. wealth items follow:

Real property and improvements, taxed and exempt, \$110,000,000,000; railroads and equipment, \$16,000,000,000; manufactured products, \$15,000,000,000; furniture, carriages, automobiles, etc., over \$8,000,000,000; live stock, over \$6,000,000,000; manufacturing machinery, tools, etc., \$6,000,000,000; street railways, over \$4,000,000,000; and agricultural products, over \$5,000,000,000. In clothing and articles of personal adornment the Gov't. has invested \$4,205,000,593. N. Y. is the richest state, with over \$25,000,000,000 of wealth; Ill. and Penn. are close rivals

for 2d, each with nearly \$15,500,000,000; then follow Ohio, with nearly \$9,000,000,000; Cal., with nearly \$8,500,000,000; Iowa, with \$7,750,000,000; Texas, with nearly \$7,000,000,000, and Mass., with over \$6,000,000,000.

Richest of the state groups is the Middle Atlantic (N. Y., N. J. and Penn.), where over \$43,000,000,000 of wealth is owned; next come the north central states (Ohio, Ind., Ill., Mich. and Wis.), with \$39,500,000,000.

In strong contrast are two groups of states—the northwestern and the southern Atlantic. The first, made up of Minn., Iowa, Mo., Ne. and So. Dakota, Neb. and Kan., the wealth is over \$31,000,000,000; in the second, comprising Del., Md., Va., W. Va., No. C., So. C., Ga. and Fla. and — of Col. there are not \$15,000,000,000 of wt

Pres., Geo. Pope; Sec., G. S. Boudinot; Asst. Sec., W. M. Benney; Treas., Henry Abbott; Gen. Mgr., J. P. Bird. Hdqrs., 30 Church, N. Y. "The Natl. Assn. of Mfrs. disapproves absolutely of strikes and lockouts and favors an equitable adjustment of all differences between employers and employees by any amicable method that will preserve rights of both parties. Employees have the right to contract for their services in a collective capacity, but any contract that contains a stipulation that employment should be denied to men not parties to the contract is an invasion of the constitutional rights of Amer. workman, is against public policy and is in violation of conspiracy laws. This Assn. declares its unalterable antagonism to the closed shop and insists that the doors of no industry be closed against American workmen because of their membership or non-membership in any labor organization."

*The Constitution of 1777 did not specify the time when the Governor should enter on the duties of his office. Governor Clinton was declared elected July 9, and qualified the same day. The Constitution of 1821 provided that the Governor and Lieutenant Governor shall, on and after the year 1823, enter on the duties of their respective offices on the 1st of January. *Lieutenant-Governor, Acting Governor. *Lieutenant-Governor, became Governor upon resignation of Martin Van Buren, March 12, 1829. INFANT MORTALITY.

The Census Bureau of the Dept. of Health, N. Y. C., estimates that on an average 1 in 8 of all the babies born in the U. S. die before they are 13 months old. But more babies die in some districts than in others, and such an average may mean that in some groups 1 in 3 of all the babies die and in others only 1 in 25. The Children's Bureau in the course of its intensive study of infant mortality in selected typical American communities has found within 1 community an infant death rate varying in the different wards from 1 baby in 10 about 1 in 4.

ALASKA FISHERIES.

The year 1915 was the most prosperous in the history of the general fisheries of Alaska, according to the report of W. C. Redfield, Secretary of Commerce, issued in Feb. 1916. The products were valued at \$5,500,000 more than those of previous season. The salmon catch was the largest ever made. The fisheries give employment to 21,200 people and represent an investment of \$37,000,000. More than 4,000,000 cases of canned salmon, valued at \$12,920,000, were exported from the country. The value of the other kinds of fish caught is placed at about \$200,000.

BOARDS OF CHILD WELFARE.

Under the Hill-McCue bill, for the relief of the children of widowed mothers, approved by Gov. Whitman, April 7, 1915, boards of child welfare, which are to administer the act, have been generally appointed throughout N. Y. State. Each county has a board of 7 members, excepting N. Y., where the membership comprises 9, with the Commr. of Public Charities as an ex-officio member. The Mayor of N. Y. designates the 8 other members while in the other counties the county judge makes the appointments, the county supt. of the poor in each co. being an ex-officio member of board. The members serve without compensation, and their administration of the law is supervised by State Bd. of Charities.

A board of child welfare may, in its discretion, when funds have been appropriated therefor, grant an allowance to any dependent widow residing in the county or city wherein she applies for an allowance, and who is deemed by the local board of child welfare to be a proper person mentally, morally and physically to care for and bring up such child or children, under 16 yrs., provided such widow has been a resident of the county or of the city wherein application for allowance is made for period of 2 years immediately preceding application, and whose deceased husband was a citizen of the U. S. and a resident of the State at time of his death.

The Bd. of Aldermen of N. Y. C. on Apr. 18, '16, approved an issue of \$300,000 of revenue bonds, payable out of 1917 taxes to be expended by the Bd. of Child Welfare. This sum is in addition to \$100,000 allowed the Bd. in the 1916 budget.

PUBLIC SCHOOLS OF THE CITY OF NEW YORK.—Continued. BUREAU OF ATTENDANCE.

154 E. 63th, Mhnt.

Statutory Title—Bureau of Compulsory Education, Schl. Census and Child Welfare. Dir., J. W. Davis, \$6,000; Asst. Dir., G. H. Chaffield, \$4,500. Est. by act of the Legislature effective May 1, 1914 (Chap. 470-471, Laws of 1914). To enforce the compulsory education law, the city has been divided into 14 attendance districts, 5 in Mhnt., 2 in Bronx, 2 in Bklyn., 2 in Queens and 1 in Richmond. A dist. supervising attendance officer has charge in each district. Each such officer is assigned for a period of 1 yr. by the Bd. of Superintendents. A chief attendance officer is in general charge of the operating staff, under assignment for 1 yr. Hearings for commitment of children to the truant schls. with the consent of the parents are conducted by the bureau, and in general are held by the chief attendance officer and two supervising attendance officers. The director has sole power to commit and parole truant and delinquent children as the result of such hearings. The schl. census features of the law require the bureau to maintain a permanent register of all children bet. 4 and 18 yrs., showing residence, name or names of parents or guardians, age, name or number of schl. attended, or reason for non-attendance, and nature and place of employment, if employed. The census is amended from time to time. The bureau acts on all violations of the compulsory education and child labor law discovered by the taking of the census, reports to the children's societies cases of parental neglect, refers cases of poverty and destitution to the charitable organizations, and reports the names of children physically or mentally defective to the educational officers especially charged with their education. It compiles information concerning the child population of each block. In the enforcement of the new boy law, it issues permits and badges, and maintains a street patrol to prevent the selling of papers by children at unauthorized hours, and by children not licensed. All boys 12-14 require permits. Chief Clerk, R. J. Suits, \$2,100; Stenographer, Mary H. O'Connell, \$1,500; Clerks, Matilda A. Weymann, Evelyn Bortell, R. F. Graves, J. H.
